

TRON OYUNU

BİRİNCİ KUKLAYA AİT KODLAR

İKİNCİ KUKLAYA AİT KODLAR

The image shows a Scratch script for a second puppet. The script starts with a 'when clicked' event block. This is followed by a sequence of blocks: 'go to x: -200 y: 0 location', 'turn 90 degrees', 'erase everything', 'set pen color to blue', 'press pen', and 'set pen thickness to 5'. A loop block follows, containing a 'repeat until' loop with two conditions: 'edge?' and 'color?'. After the loop, there is a 'move 3 steps' block. The script ends with a 'stop all' block. Below the main script, there are two additional event blocks: 'when key d is pressed' followed by 'turn 90 degrees', and 'when key a is pressed' followed by 'turn 90 degrees'.

```
when clicked
  go to x: -200 y: 0 location
  turn 90 degrees
  erase everything
  set pen color to blue
  press pen
  set pen thickness to 5
  repeat until (edge? or color?)
  move 3 steps
  stop all

when key d is pressed
  turn 90 degrees

when key a is pressed
  turn 90 degrees
```
